Please select one interview for your individual pre-assignment and consider the following:

① What were the issues related to culture in the interview? Please give more than one if there were more than one. Same as the last question of the pre-assignment but if you would like to rephrase please do so. Especially if you added some new aspects after the first and the second classes.

② Were there any cultural dimensions involved in ①? If yes, which dimension(s)?

cont.

③How would multicultural adaptation of each of the characters lead to a solution of the issue? Could anything else be done other than multicultural adaptation?
